

)selfcontained(

portable space

the right place

Self Contained is a family run business that's been involved with transport logistics since 1955 and specifically with shipping containers since 1974. 100% Australian owned and operated, Self Contained supplies new and used shipping containers throughout Australia.

the right product

Self Contained stocks a large range of customisable products including 10', 20' and 40' containers. All Self Contained products are fully portable and can be delivered and installed to any location within Australia.

Along with the standard generic shipping containers, Self Contained offers other customised containers to be used for the following applications:

- Office
- Kitchen
- Residential
- Shower block
- Toilet
- Laundry block
- Change rooms
- Office or home storage

All Self Contained shipping containers are covered by a 12 month parts only warranty.

the right price

Over the years Self Contained has built and maintained strong industry relationships that now enable the company to provide their customers with the highest quality product and service at a very competitive price.

the right people

Self Contained has a large team of highly skilled assemblers, plumbers, electricians and carpenters who, upon delivery, can assemble or customise the shipping container to the customer's specific requirements. Self Contained provides small customisation, like branding a container with the customer's company logo, through to larger scale solutions, such as adjoining multiple containers on top of each other to create a larger structure and space.

the right attitude

Self Contained is a 'can do' business. There's no space problem too big or too small for our friendly Self Contained staff to solve.

Why use shipping containers?

1. portable

Shipping containers are easily transportable by land, air or sea and upon arrival can be seamlessly positioned by forklift, tilt truck, side loader or mobile crane. Additionally, by virtue of its structure, preparation for relocation takes almost no time at all.

2. durable

Shipping containers are made from reinforced solid steel and built to survive the tough existence of transporting goods around the world.

3. secure

Shipping containers come standard with industrial strength double swing doors that can be locked or welded shut upon request.

4. cost effective

Currently the most cost effective space solution available on the market.

5. space efficient

Shipping containers can be stacked on top of each other or side by side to create maximum space efficiency.
